# Integrated Patient Solutions

## OFFICE COMMUNICATION

### Shared Inbox

HIPAA compliant document sharing between connected offices. Send radiographs, photos, receive referrals and more.

### Secure Messaging and File Transfer

HIPAA compliant messaging and file transfer within your office and between connected offices. Send radiographs, photos, documents and more.

### Secure Email

Send HIPAA compliant encrypted emails and files to anyone outside the drtalk network.

### Refer a Patient

Refer patients to specialists from your desktop.

### eFax

Send and receive faxes online directly from your desktop app.

## PATIENT COMMUNICATION

### Web Chat

Capture the patient enquiry or appointment request from your website chatbot even when you can't be there. Convert your leads into patients right from your desktop app.

### 2-Way Texting

Improve patient satisfaction and care with 2-way messaging right to their phone. Use your existing office number to send and receive text messages to patients.

### Patient Email

Send patients secure, HIPPA compliant, encrypted email and files.

### Curbside Check-in

Patient check-in, arrival, COVID 19 survey assessment sent to your patient's phone. In-office real time centralized hub display. It's fully automated. Eaglesoft and Dentrix EMR integration, HIPAA Compliant and 2-way texting.

# Patient 2-Way Texting

Convenient interactions for you and your patients even after they walk away from the computer. Use your existing office number to send and receive text messages with the patients.

Keep the conversations going.

- ✓ Dedicated number
- ✓ 2-way Texting
- ✓ HIPAA Compliant

# You'll wonder how you ever survived without it.
